

A PLANET - TECH COMPANY

Making Nature Visible in Decisions

Transforming environmental data into decision-grade
Environmental Intelligence helping governments, enterprises
and financial institutions make better environmental decisions.

Meet the Visionaries

The humans behind the mission. Builders, dreamers, and stewards of the planet.

From Data → to Decision

The world has spent decades measuring nature.
ErthaLoka makes those measurements decision-ready — for the first time.

The Current Cycle

STATUS QUO

Periodic, backward-looking, disconnected from decisions.

- 1 Measure**
Field surveys, annual
- 2 Account**
Ledger entries
- 3 Report**
PDF published 18 months later
- 4 Archive**
No decision triggered

✗ Dead end — no decision made

The Intelligence Loop

ERTHALOKA

Continuous, real-time, embedded in decisions.

- Measure**
LiDAR · GIS · Remote Sensing · IoT
- Monitor**
Real-time dashboards · Anomaly detection
- Decide**
AI signals in credit, investment, policy
- Act**
Nature-linked finance · Conservation triggers

✓ Continuous intelligence loop

How It Works

Five layers of deep-tech intelligence powering ErthaLoka's environmental monitoring system.

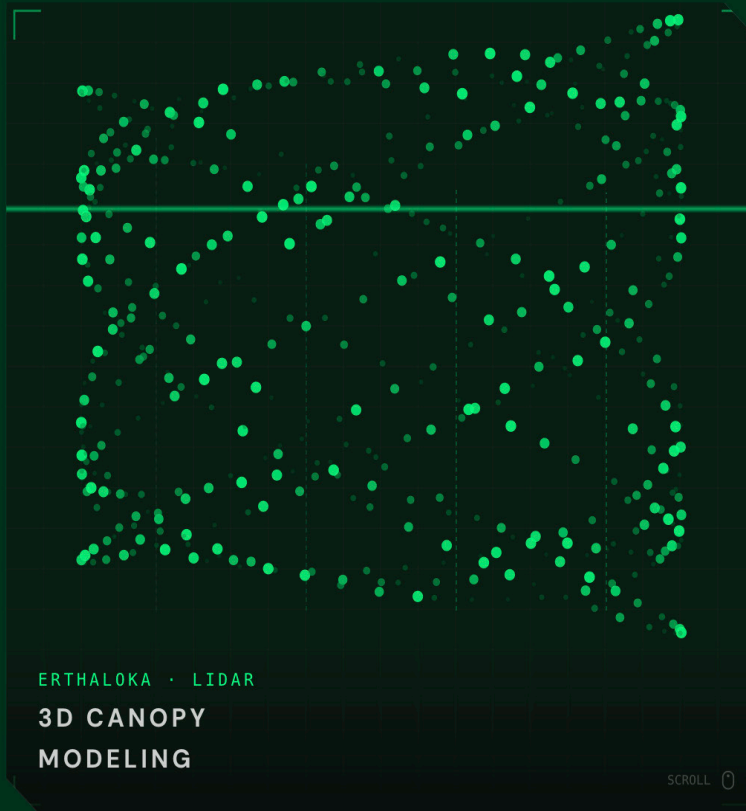

01

02

03

04

05

01 LiDAR

Creates 3D canopy models measuring tree height, biomass volume, and understory vegetation. Validates carbon stock claims with 10cm precision across 1M+ hectares. Detects illegal logging invisible to satellites.

10cm **1M+ ha** **Sub-canopy**
PRECISION COVERAGE DETECTION

02 GIS

03 Remote Sensing

04 AI / ML

05 IoT

Solutions

Tailored solutions for organizations ready to integrate nature into their strategy.

Government

Enable policy-backed nature accounting, compliance monitoring, and green credit programme alignment.

Enterprises

Identify nature-related risks, strengthen supply chains, and move ESG from reporting to decision-making.

Institutions

Integrate nature into credit risk, portfolio screening, and nature-linked finance.
